

[Deprecated] Reporting to Icelandic Government

Reporting to Icelandic Government

Our ongoing reporting to the Icelandic government

The Icelandic Government issued a permit for Running Tide's work in Iceland.

As part of our permit requirements, we share data and consult with relevant institutions and agencies in Iceland on an ongoing basis. These are the Marine and Freshwater Research Institute, the Environment Agency of Iceland, the Icelandic Coast Guard, and the Transport Authority. We share reports quarterly related to ongoing, planned, and completed research projects and deployments.

(You can see general updates from our work in Iceland on our Iceland blog, iceland.runningtide.com – in Icelandic)

Q4 / 2023
